HOSE

RH15

EXCEEDS SAE 100R15

Internal hose: Oil resistant synthetic rubber.

Reinforcement: 4-6 high tensile steel wire braids.

External covering: Synthetic rubber, resistant to oils, fuels and atmospheric conditions. MSHA cover.

Operating temperature range: -40°C to +100°C, 120°C intermittent

HOSE

RH7

EXCEEDS SAE 100R7

Internal hose: Polyester elastomer.

Reinforcement: 1 or 2 synthetic fibre braids

External covering: Polyurethane, black pinpricked.

Operating temperature range: -40°C to +100°C, 70°C for water based fluids.

INSTALLATION

HOSE INSTALLATION RECOMMENDED PROCEDURE

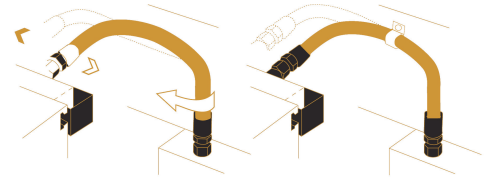

Lengths: Too long, hose can cause pressure drop and effect system performance. Too short, hose can pull from fittings or cause seal failure.

WARNING: No hose can be relied on if not correctly assembled.

1. Use correct hose for each application
2. Never allow hose to pull
3. Never twist hose
4. Never install hose where temperature, rubbing or abrasion are excessive.

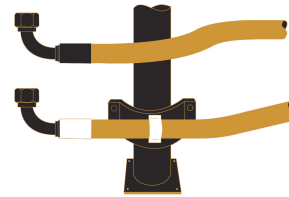

Prevent hose bending in more than one place: if hose follows a different bend, clamp it to separate sections, or clamp so it will flex in only one section.

INCORRECT

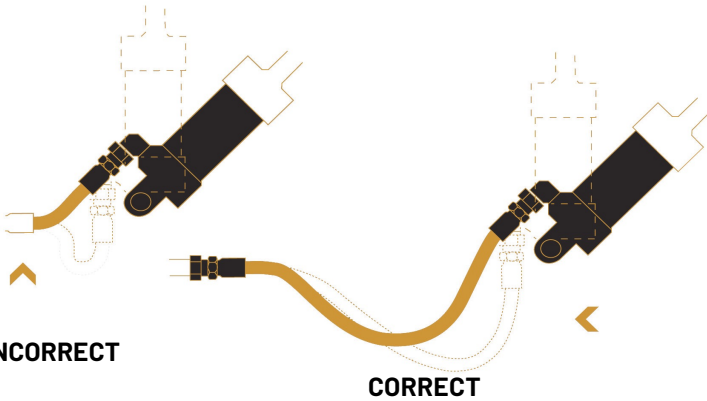

CORRECT

Hose routing example: when hose is subject to high temperatures, keep away from area, or insulate.

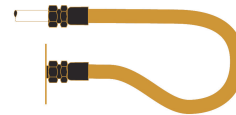

Motion Absorption: Provide correct length to distribute movement

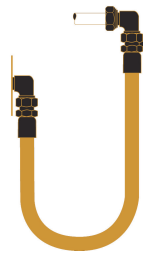

Hose routing example: When hose radius is required to be at a minimum length, use adaptors or appropriate hose tails.

INCORRECT

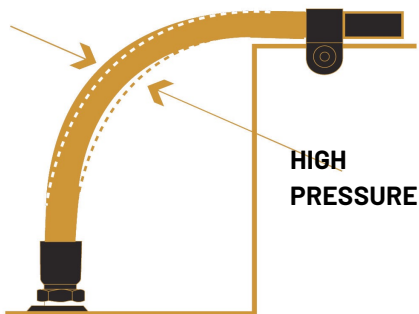

CORRECT

Correct length for pressure changes: Provide enough length to accommodate for changing pressures

NO PRESSURE

Hose pressure & machine tolerances: Provide enough length to accommodate changing pressures & movement.

INCORRECT

CORRECT

MHS Spiral Guards

Spiral guard is suitable for the protection of most types of hydraulic, pneumatic and industrial hose assemblies across a wide range of industries. It has excellent recovery memory to maximize the hose coverage and exceptional anti-crushing performance. It maintains a high abrasion resistance; it's been proven in arduous conditions and has good resistance to UV rays. Spiral guard is suitable for wrapping single hoses or multiple hose bundles and comes conveniently packed in cartons for easy storage.

Spiral Guards are also available in various colours.
