MHS HOSE MANAGEMENT SERVICE: Test and Tagging of Hose Assemblies

All hose assemblies should be tested in accordance with the hose manufacturer's recommendations.
MHS recommends inspection and re-testting of hose assemblies regularly and consistently.
All hoses are tested at a pressure no greater then 1.5 times the maximum working pressure.

MHS Test Tag

Select the Right Hose Every Time by Using the S-T-A-M-P-E-D Method

- **S** Size (ID, OD, OAL)
- **T** Temperature (Internal / External)
- **A** Application (Flexed, Static, Usage)
- **M** Material (Inside & Outside exposure)
- **P** Pressure (Working Pressure, Vacuum)
- **E** Ends (Built in, clamped, crimped)
- **D** Delivery (Same day, 1 week)

Delivering to All Parts of Australia
